PROJECTS

Smart Contact Manager ([GitHub](#))

- Built a secure and scalable contact management system with authentication, security, and database optimization having fields like name, email, number, LinkedIn, GitHub, and address.
- Integrated Google/GitHub OAuth2 login, full contact CRUD operations, and cloud storage using Cloudinary.
- Tech Stack: Java, Spring Boot, Spring Security (JWT/OAuth2), Spring Data JPA, MySQL, Thymeleaf, and Tailwind CSS for end-to-end development.

URL Shortener ([GitHub](#))

- Built a full-stack web application to shorten long URLs with custom keys and expiration time.
- Implemented user authentication and role-based access (admin/user) using Spring Security.
- Used Java, Spring Boot, Spring Security, JPA, Bootstrap CSS, Thymeleaf, MySQL, Maven

Quiz App (Open Source) - Present ([GitHub](#))

- Developed a secure, full-stack quiz platform with AI-generated questions, real-time scoring, and role-based access control using Keycloak.
- Built and containerized the application with Spring Boot (Gradle), PostgreSQL (Docker), and documented APIs using Swagger.
- Integrated an interactive React + Vite frontend with scalable RESTful backend services for a smooth user experience.

Tech Stack: Java, Spring Boot, Keycloak, Spring Security, Spring Data JPA, PostgreSQL, React, Vite, REST API, Swagger, Docker.
